DynamoDB

GitHub

## WORK EXPERIENCE

### APPLICATION DEVELOPER 1 (CO-OP)

Wawanesa Insurance Innovation Lab, 09/2020 to 12/2020, Remote

- Worked with React for the frontend development of a web application that acted as a test platform for Innovation Lab experiments
- Updated React application from class components architecture to functional components and utilized React hooks for a better development experience
- Implemented responsive design standards to allow for a cohesive experience across devices
- Worked closely with designers on UX/UI decisions
- Backend development using AWS cloud computing with a Node.js runtime
- Participated in code reviews
- Presented weekly demos to stakeholders
- Lead testing for a web application to capture user data and consolidated feedback to create sprint tasks
- Completed research projects on Serverless Monitoring and NearMaps
- Completed an API research project utilizing open data sources
- Consulted with the company's legal team, broker managers, and underwriting managers to investigate project viability
- Presented my API research findings at Wawanesa's National Business Development Meeting

### LOUNGE SERVER

The Fairmont Winnipeg, 04/2015 to Present, Winnipeg, MB

- Coordinated with a team of talented bartenders, management, and culinary staff to deliver excellent guest experiences. Our department consistently achieves high service audit scores, often ranking in the top 3 in the hotel
- Honoured to serve hotel's VIP guests, including high-ranking government officials, musicians, and film crews
- Achieved 100% on my Leading Quality Assurance audit. A hospitality audit, where an auditor ranks service while incognito, both in service standards and emotional intelligence rankings
